PREFACE

This report lists mines active in California during 1986. An "active" mine is defined here as one with production during 1986. Data included in the list are name of mining company, address, name of mine, lead agency for approval of reclamation plan for the mine, and whether or not the mine has an approved reclamation plan.

We are grateful to many organizations and individuals that provided the data presented in this report. In particular, we thank the mining companies and operators who patiently endured our canvasses. Others that provided data include county and city governments; U.S. Bureau of Mines, Mine Safety and Health Administration; California Occupational Health and Safety Administration; Aggregate Producers Association of Northern California; Central Valley Rock, Sand, and Gravel Association; San Diego County Rock Producers Association; and Southern California Rock Products Association; and California Mining Association.

The reclamation plan information included in this list was obtained from a variety of sources and was intended to be current at the time of data collection. Mining methods, status, and reclamation plans may change during the life of the list. The reclamation plan status entry of "yes," "no," or "pending" refer only to reclamation plans as called for under the State Surface Mining and Reclamation Act (SMARA). If plans for the reclamation of mined lands are authorized by a Federal agency, e.g., U.S. Forest Service, a "no" is entered in answer to the question. Approximately 46 percent of the land of the State of California is under Federal agency management. For each active mine entry we have indicated "yes" it is on Federal land or "no" it is not.

The following table briefly summarizes the distribution of mines by commodity:

Mines Active in California during 1986 by Commodity

Product	No	%
Sand and Gravel	423	52
Stone	80	10
Limestone	31	4
Shale	22	3
Clay	36	4
Gold	32	4
Borates	5	1
Talc	11	1
Gypsum-Anhydrite	12	1
Other	154	19
Total	806	

The Division of Mines and Geology periodically updates the list of active mines in California. If you have corrections or changes to the list, please notify the Mineral Resource Appraisal Program, Division of Mines and Geology, 630 Bercut Drive, Sacramento, CA 95814 [phone: (916) 323-8554].
